

Coordinating Panel for Advanced Detectors (CPAD) Workshop 2013

Organized by the Division of Particles and Fields of the American Physical Society

January 9-12 Argonne National Laboratory, Illinois

indico.fnal.gov/event/CPAD2013

The primary goal of the Coordinating Panel for Advanced Detectors is to promote, coordinate and assist in the research and development of instrumentation for High Energy Physics nationally on behalf of the community, and to help develop and formulate a detector R&D program to support the mission of High Energy Physics for the next decades. CPAD has been formed under the auspices of the Executive Committee of the Division of Particles and Fields, which consists of representatives from the national high-energy physics laboratories and the university community.
